If “PocketSmart AI: Your Smart Budget & Recommendation Assistant” is your project title, you can structure the project like this:

📱 Project Title

PocketSmart AI: Your Smart Budget & Recommendation Assistant

💡 Project Idea

PocketSmart AI is an intelligent personal finance assistant that helps users track expenses, manage budgets, analyze spending habits, and receive personalized recommendations. The system uses AI to understand the user's financial behavior and suggest ways to save money.

🎯 Objectives

- Track daily income and expenses.
- Categorize expenses automatically.
- Create and monitor monthly budgets.
- Analyze spending patterns.
- Provide personalized saving recommendations.
- Alert users when they are approaching or exceeding their budget.
- Help users make smarter purchasing decisions.

🔑 Main Features

1. User Registration & Login
2. Income and Expense Management
3. AI-Based Expense Categorization
4. Budget Creation

5. Spending Analytics & Charts
6. Smart Recommendations
7. Budget Alerts
8. Monthly Financial Reports
9. AI Chat Assistant
10. Savings Goal Tracking

🤖 AI Component

The AI assistant can analyze:

- Previous spending
- Monthly income
- Expense categories
- Budget limits
- Savings goals

It can then provide recommendations such as:

> “You spent more on food this month compared with last month. Reducing food expenses by ₹1,000 could help you reach your savings goal faster.”

🛠️ Possible Technology Stack

Component	Technology
Frontend	HTML, CSS, JavaScript React
Backend	Python Flask / Django
Database	MySQL / SQLite / MongoDB
AI/ML	Python, Scikit-learn
Charts	Chart.js
Authentication	JWT / Firebase

AI Assistant NLP / LLM API

📊 Basic System Flow

User → Enter Income & Expenses → Database → AI Analysis → Spending Analysis → Personalized Recommendation → User

📝 Short Abstract

PocketSmart AI is an AI-powered personal finance management system designed to help users manage their money efficiently. The application allows users to record income and expenses, set monthly budgets, monitor spending patterns, and track savings goals. By analyzing financial data using artificial intelligence, PocketSmart AI provides personalized recommendations and alerts to encourage better spending and saving

habits. The system presents financial information through simple dashboards and visual reports, making personal budgeting easier and more understandable for users.
